Experience

NVIDIA Santa Clara, CA
Software & Automation Engineer Mar 2025 – Present

- Developed an agentic triage platform that dispatches AI agents on test failure to debug live environments and capture evidence before teardown.
- Built evaluations for agent debugging and reporting that consolidates test results and evidence across systems into unified bug reports.
- Onboarded projects into QA end to end, establishing validation workflows from initial setup through test execution and reporting.
- Executed existing CUDA and GPU driver validation suites across Linux and Windows; automated regression workflows with Python and Ansible.

Data Engineer – NeMo (Generative AI) Aug 2024 – Mar 2025

- Developed data pipelines and analytical dashboards supporting LLM training and evaluation.
- Created dataset quality metrics for annotation bias, linguistic diversity, and consistency.

NASA / City of Los Angeles Project Remote
Student Researcher Sep 2021 – Dec 2024

- Built machine learning models to estimate air pollution from satellite imagery and sensor data.
- Connected model inference to a public web dashboard using AWS.

AllCare Therapies Cerritos, CA
Software Engineer Intern Jun 2024 – Aug 2024

- Developed a document classification pipeline using AWS Lambda and Step Functions to automate document processing.

Selected Experiments

NBA Policy Lab · Agent decision-making and incentives

- Extended Basketball GM with agents representing 30 teams, each with its own roster context and goals, to explore how league rules shape decisions and incentives.
- Implemented team decision loops with context, memory, legal trade execution, and logs to study agent behavior within simulated seasons.

Kaivra · Agent-authored visual explanations

- Built a structured animation format and MCP tools for AI-authored explainer videos; synchronized animation with narration and iterated on visual explanations of concepts.

Technical Skills

Python, SQL, Bash · Agent workflows and evaluations · MCP
Linux, Windows, AWS, Docker, Ansible · CI/CD and GPU software validation

Education

University of California, Riverside Dec 2024
B.S. Computer Science with Business Applications
